

ACTELLIC®

Solvent Free Liquid Insecticide

Fast, Effective Control of Public Health Pests

ACTELLIC® controls a wide range of insect pests including those resistant to synthetic pyrethroids, organochlorines and some organophosphate compounds.

Key Features

- Excellent activity against nuisance pests such as mosquitoes, flies, ants, cockroaches, bed bugs, beetles, and other crawling insects
- Three way action; Contact, Ingestion and Fumigant (Vapour Phase)
- Low toxicity to non-target species
- Eradication of existing infestations
- Spray persists on walls and inert surfaces to give long-term control
- Use outdoors and indoors in homes and in industrial and catering facilities
- AQIS Instrument of Approval supports use in export & food facilities
- Available in 500 mL and 5 L

General Pest Control Recommendations

ACTELLIC is approved for the control of cockroaches, ants, fleas, spiders, silverfish, bed bugs, flies, mosquitoes and mosquito larvae in and around domestic situations, public service areas, agricultural buildings, commercial and industrial areas and refuse tips. See Directions for Use for full details of pests controlled and use recommendations.

Carpets, Mats and Soft Furnishings

ACTELLIC must not be applied to carpets, mats and soft furnishings.

Activity Against Problem Pests

ACTELLIC has proven performance against those difficult to control nuisance pests such as ants and bed bugs. The intrinsic activity of pirimiphos-methyl against these pests as well as the three-way mode of action [Contact, Ingestion and Fumigant (Vapour Phase)] provides fast knockdown, while the solvent free emulsion formulation provides excellent residual activity on a range of surfaces.

However, to ensure effective long-term control of both ants and bed bugs, all stages of these pests must be controlled and steps taken to prevent re-infestation. Integrated bed bug and ant management practices are therefore advised, involving the use of a range of insecticide types and control strategies.

Odour Management for Indoor Use

ACTELLIC has a distinctive odour that is evident during and immediately following application. When applying the product indoors care should be taken to avoid any residual odour.

In sensitive situations the addition of de-odourisers such as Anotec* may reduce odour persistence.

DO NOT over-apply to beyond the point of run off.

DO NOT apply to carpets, mats and soft furnishings.

SOLVENT FREE LIQUID INSECTICIDE

Active Constituent: 900 g/L PIRIMIPHOS-METHYL

For control of insect pests in and around domestic situation, public service areas, agricultural buildings, commercial and industrial areas. Also for use as an admixture treatment for the control of insect pests (except Lesser Grain Borer) in stored cereal grain and peanuts, and for disinfestation of empty grain and peanut stores and equipment as per Directions for Use.

GROUP 1 B INSECTICIDE

NRA Approval No: 46465/1201

Pack size: 5 L and 500 mL

Public health situations: Apply the diluted insecticide by means of knapsack sprayer, bucket pump or other sprayer capable of giving a coarse spray directly onto exposed surfaces frequented by pests. DO NOT store diluted insecticide. Prepare a fresh spray as required.

Where to apply ACTELLIC

Ants: Nests, runs, walls, drains, ant trails, windows, doors and resting places where ants are seen.

Cockroaches: Walls, cupboards, skirting boards, behind sinks, stoves and pipes. Pay particular attention to cracks and crevices.

Flies: Refuse tips, resting areas (eg. ceiling, windows, screens).

Fleas: Skirting, floors, kennels and adjacent wall areas.

Spiders: Exposed surfaces where spiders are seen, nests and known hiding places.

Silverfish: Walls, cupboards, cracks and crevices, ceilings and enclosed floor spaces.

UN NO. 1224 KETONES LIQUID, N.O.S. (CONTAINS METHYL ISOBUTYL KETONE) PACKING GROUP III HAZCHEM 3[Y] MARINE POLLUTANT

Houseflies and Mosquitoes: All exposed surfaces where these flying insects may rest (eg. walls, ceilings, verandahs).

Mosquito Larvae: Unused water troughs, stagnant ponds and other mosquito breeding harboursages.

Bed Bugs: Skirting boards, floors and adjacent wall areas. Machine wash bed linen at time of treatment to destroy bed bugs in sheets and blankets. Apply an alternative treatment to carpets and seek advice on integrated bed bug management practices.

PRECAUTIONS

Public health situations: Cover all foodstuffs before application. DO NOT allow spray to contact food, food preparation surfaces or utensils. DO NOT spray directly on humans, exposed food or food utensils.

THE FOLLOWING IS AN EXTRACT OF THE PRODUCT LABEL AND DOES NOT CONSTITUTE THE COMPLETE DIRECTIONS FOR USE. THE PRODUCT LABEL SHOULD BE READ THOROUGHLY BEFORE OPENING THE PACKAGING:

Situation	Insects Controlled	States	Rate	Critical Comments
Domestic Situations, Public Service Areas, Agricultural Buildings and Commercial and Industrial Areas	Cockroaches	All States	110 mL/ 10 L water	Apply thoroughly to cracks, crevices and other areas where cockroaches may hide. Apply to run off point. A thorough wetting of all areas is essential. DO NOT apply to carpets, mats or soft furnishings.
	Fleas, Ants, Spiders, Silverfish, Bed Bugs, Flies			Apply thoroughly to all areas to be treated to run off point. DO NOT apply to carpets, mats or soft furnishings.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.
