

GENERATION® BLOCK PRE-BAITED STATION

Testimonial

“It’s because the pre-pack stations are quick and easy! Their small size makes them really simple: You can follow your customer with several in your bag and ask them to show you where they have seen mice before. Check and inspect the area to find the best placement and put down a pre-baited station. Then carry on with your customer to the next hot spot! Having the stations individually labelled is also a major feature. All the information needed by the customer is on every single station.”

Terry Miller, Panther Termite Specialist, QLD

Practicality Features:

- Carton of 60 Generation® pre-baited stations
- Each pre-baited station contains 20 grams Generation® Block (Difethialone, 25ppm)
- Ask us about private labelling

GENERATION® BLOCK PRE-BAITED STATION

Fastest Mouse Control Soution

GENERATION® PRE-BAITED STATION IS

- Ready-to-go pre-loaded with 20 g Generation Block
- Robust and tamper resistant
- Streamline design for quick placement
- Ideal for mouse control in domestic situations, office spaces, etc.

➤ WHAT MAKES GENERATION® PRE BAITED STATIONS DIFFERENT?

- Contains the highly palatable Generation® block that mice can't resist

- Pre-baited means time saving. No more need to spend time on filling up bait statoins - just focus on their optimum placement.
- Bait is firmly secured inside sturdy tamper-proof bait station for reduced risk of non-target accidental poisoning.
- Increased longevity as bait protected from humidity
- Small size and streamline design allow to place it everywhere in minimum amount of time.
